THE JOURNAL OF
LOGIC PROGRAMMING

VOLUME 41, NUMBERS 1, 2 and 3, 1999

CONTENTS

Regular papers

Stable generated models, partial temporal logic and disjunctive defaults
J. Engelfriet and H. Herre **1**

A declarative semantics for depth-first logic programs
B. Elbl **27**

A pragmatic reconstruction of λProlog
C. Belleannée, P. Brisset and O. Ridoux **67**

A semantic basis for the termination analysis of logic programs
M. Codish and C. Taboch **103**

Technical notes

Worst-case groundness analysis using positive Boolean functions
M. Codish **125**

On the Floyd–Warshall algorithm for logic programs
C. Papadimitriou and M. Sideri **129**

Special issue

Guest editors' introduction
A. Bossi and Y. Deville **139**

Inductive synthesis of recursive logic programs: achievements and prospects
P. Flener and S. Yılmaz **141**

Synthesis and transformation of logic programs using unfold/fold proofs
A. Pettorossi and M. Proietti **197**

Conjunctive partial deduction: foundations, control, algorithms, and experiments
D. De Schreye, R. Glück, J. Jørgensen, M. Leuschel, B. Martens and M.H. Sørensen **231**

Abstract multiple specialization and its application to program parallelization
G. Puebla and M. Hermenegildo **279**

Author Index – Volume 41 **317**

Subject Index – Volume 41 **319**

Contents – Volume 41 **321**
